Summit Point Logistics Park - Appraisal Valuation Memo

Prepared June 2026 | Restricted appraisal memo

Valuation Conclusion

The appraisal memo estimates stabilized net operating income using a 27.00% operating expense ratio and a 5.75% terminal capitalization rate. The appraiser's exit cap conclusion reflects recent trades for large multi-building logistics assets with material tenant concentration.

The appraiser identifies a stabilized value range of $405,000,000 to $425,000,000 depending on terminal capitalization rate and re-tenanting reserves.

Appraiser Assumptions

Assumption	Appraiser Conclusion
Exit cap rate	5.75%
Operating expense ratio	27.00%
Disposition costs	2.00%
Market vacancy	5.00%
Terminal re-tenanting reserve	$7,500,000

Valuation Risk

The appraiser notes that Summit Point's cold-storage component may trade at a premium if fully leased to credit tenants, but that value is sensitive to the continuity of specialized cold-chain tenancy. A single-tenant termination or downgrade would likely expand the terminal cap rate and reduce exit liquidity.
