

Rate Lock and Hedging Addendum

Rivergate Innovation District - Synthetic Agir V5 Test Fixture 3 - Confidential Draft

Updated Rate Guidance

After the initial lender term sheet, the treasury desk issued a rate lock addendum. For underwriting sensitivity and final credit sizing, the all-in interest rate should be tested at 7.10%.

This creates a documented conflict with the original 6.85% interest rate in the senior lender term sheet. The conservative resolution is 7.10%.

Item	Value
Original term sheet interest rate	6.85%
Updated rate lock all-in interest rate	7.10%
Recommended underwriting rate	7.10%
