

Summit Point Logistics Park - Industrial Market Study

Prepared June 2026 | Confidential market analysis

Market Summary

The I-85 logistics corridor remains one of the Southeast's most active distribution markets. Current market vacancy is estimated at 4.20% for modern Class A logistics space and 5.10% for cold-storage product. Net absorption has remained positive but moderated from the prior year.

The market study supports stabilized occupancy of 96.00% for dry warehouse, 94.00% for cold storage, and 92.00% for last-mile flex space.

Market Rent and Occupancy Support

Component	Rentable Area / Count	Supported Market Rent	Supported Occupancy
Dry Warehouse	760,000 SF	\$18.75 per SF	96.00%
Cold Storage	280,000 SF	\$31.50 per SF	94.00%
Last-Mile Flex	200,000 SF	\$24.00 per SF	92.00%

Market Risk Commentary

The market study notes that new supply totals approximately 2,800,000 SF over the next 24 months. While near-term fundamentals remain favorable, the report cautions that large-format logistics cap rates have moved into a 5.75% to 6.25% range for assets with concentrated tenancy or specialized improvements.

The study identifies tenant concentration as the primary risk. It recommends stress-testing a partial downtime scenario if Horizon Commerce exercises its year-6 termination option.
